**DETAILED ACTION**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 8/5/2010 has been entered.

Claims 1-3, 6-10, 18, 31-33 are in the case.

MPEP § 1.142 Requirement for restriction.

(a) If two or more independent and distinct inventions are claimed in a single Application, the examiner in an Office action will require the applicant in the reply to that action to elect an invention to which the claims will be restricted, this official action being called a requirement for restriction (also known as a requirement for division). Such requirement will normally be made before any action on the merits; however, it may be made at any time before.

Claims 1-3, 6-10, 18, 31-33 are subject to the following Requirement.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Claims are drawn to compounds of formulae I and III. With regards to variable R5 of these formulae, applicant is reminded of the following:

*In re Zletz*, 13 USPQ2d 1320, 1322. "An essential purpose of patent examination is to fashion claims that are precise, clear, correct and unambiguous."

#### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-3, 6-10, 18, 31-33, drawn to compounds of the given formulae formulae I or III in which

R<sup>5</sup> is a radical (W)-X)-(Y)-Z, where

W is a bond, X is a bond, Y is a bond and Z is NR51R52 wherein

R<sup>52</sup> at each occurrence is independently selected from the group consisting of hydrogen, C<sub>1</sub>-C<sub>6</sub>-alkyl, C<sub>2</sub>-C<sub>6</sub>-alkenyl, C<sub>2</sub>-C<sub>6</sub>-alkynyl

Group 2, claim(s) 1-3, 6-10, 18, 31-33, drawn to compounds of the given formulae formulae I or III in which

R<sup>5</sup> is a radical (W)-(X)-(Y)-Z, where

(W)-(X)-(Y)-(Z) is E.

That is R5 is E.

Group 3, claim(s) 1-3, 6-10, 18, 31-33, drawn to compounds of the given formulae  
formulae I or III in which R5 is

W is selected from the group consisting of NR<sup>54</sup>, NR<sup>54</sup>-(C<sub>1</sub>-C<sub>4</sub> alkylen) and a bond

Group 4, claim(s) 1-3, 6-10, 18, 31-33, drawn to compounds of the given formulae  
formulae I or III **other than** compounds of Group 1-4. If this group is elected election  
of a single disclosed species would be required. The term species refers to a molecule  
(i.e., a chemical structure without any variables). Disclosed means shown in the instant  
specification without need to picking or choosing variables.

The inventions listed as Groups 1-4 do not relate to a single general inventive concept  
under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or  
corresponding special technical features for the following reasons: the common  
technical feature in all groups is the indolone ring system. This element cannot be a

Art Unit: 1625

special technical feature under PCT Rule 13.2 because the element is shown in the prior art compound SSR 149415 (applicant cited).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof. Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result**

**in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
